

Resources

View the following Snaps resources in addition to this documentation site.

Primary resources

- [Snaps homepage](#)
- [Snaps directory](#)
- - A directory of allowlisted Snaps you can try in the MetaMask extension.
- [SIPs](#)
- - Suggest new Snaps APIs with Snaps Improvement Proposals.
- [Builder Engagement Program](#)
- - Connect with the Snaps builder engagement team and get support while building your Snap.

Example Snaps

- [Example Snaps](#)
- - A directory of
- Snaps maintained by MetaMask.
- [Linea Voyager](#)
- - View Linea XP balance, PoH status, and current Linea Voyage activations from within MetaMask.
- [Starknet](#)
- - Adds Starknet account and transaction functionality to MetaMask.
- [Simple Keyring Snap](#)
- - An example account management Snap using the [Keyring API](#)
- .
- [Mystery Fox](#)
- - Provides random answers to questions and showcases interactive UI and images.
- [Farcaster Insights](#)
- - Shows if the recipient in a transaction request has a Farcaster account and their stats.
- [Smart Account Template](#)
- - Template for integrating the Biconomy Smart Account with the [Keyring API](#)
- .

Developer tools

- [Template Snap](#)
- - A rich template that
- includes TypeScript/React and vanilla JavaScript options, a CLI for building, packaging, and
- deploying your Snap, and a companion dapp UI you can build on.
- [Snaps Simulator](#)
- - A tool for simulating
- Snaps in the browser, streamlining the development process.
- [Test Snaps](#)
- - A collection of
- test Snaps and [a dapp for evaluating them](#)
- .

Community

- [Snaps GitHub discussions](#)
-)
 - Browse discussions and
- ask questions about Snaps.
- [Consensys Discord](#)
-)
 - Ask questions about Snaps on themm-snaps-dev
- channel.
- [Snaps GitHub issues](#)
-)
 - If you encounter any issues with
- Snaps, open a GitHub issue.

Snaps for developers

Many Snaps are designed to be used by developers.

- [CubeSigner](#)
-)
 - Enables dapp developers to manage keys for Ethereum, Bitcoin, Solana, and more using secure remote hardware.
- [Galactica ZK Vault](#)
-)
 - Integrates the Galactica Network for dapps to leverage ZK-proofs for compliant privacy.
- [Hedera Wallet](#)
-)
 - Build Hedera dapps with the methods provided by Hedera Wallet.
- [Leap Wallet](#)
-)

- Connect Cosmos dapps to MetaMask with Leap Wallet.
- [MinaPortal](#)
- - Build ZkApps on Mina Network with the dapp methods provided by MinaPortal.
