

Hello,

I've been working on a concept for a holonic community computer where Celestia plays a key role. Notably, i've been playing with the idea of social rollups which seems quite fruitful, but i'm not certain about 1. the implementation on Celestia or 2. if the concept is accurate. I'd very much appreciate any aid in bringing the ideas into clearer focus, as it is a WIP.

Here's a link: [Holos: A Holonic Community Computer 0.3 - Google Docs](#)

To you,

minimintrue
