

Hello! Paranormal Bros.

here.

We are validator and monitoring tools developer for Cosmos ecosystem chains.

Entity name & Location:

Paranormal Bros., team located in few countries across Europe

Infrastructure location:

France, Germany, Finland, Russia, India

Type of hardware & region:

Bare metal. Validator nodes usually in France and Germany. Backups and relayers are around the world.

Technical make-up of team:

Two DevOps engineers, Apps coder, designer.

Years of experience:

Validating since 2021, all team members are 10+ years in IT projects.

Other networks:

Persistence, Comdex, BitCanna, AssetMantle, Haqq, and many testnets.

Best Practices:

1. Validators side: use robust monitoring and alerting to always keep fingers on the pulse. Don't trust automation too much, perform the most important actions manually or under control.
2. Team side: create few communication channels (not only Discord) with validators to be able to interact fast and to spread information more focused.

Voting Framework:

Decisions are made based on the balance of the community needs and the team vision. We study the interests of both parties in detail and make decisions that have a positive impact on the project evolution.

Additional roles:

Technical support by relayers, endpoints, snapshots, etc.

Other products or services:

We will implement all our monitoring platforms for dYdX.
