

They send an email with the title:

“Numerai submission accepted - {YOUR_MODEL_NAME} | Round {ROUND_NO}”

If you have that email then the models submission was successful. If you don't have it then your submission wasn't successful, and that'd explain why you don't have scores.

If you only submitted your submissions for your second model this week, then it'd be the scores weren't out yet. We submit with a deadline of 2:30pm UTC Monday, but the scores for the latest round submitted don't come out until Thursday at around 6pm UTC. The scores for the latest round are out now, so you should see them now if that was the issue.
