

How to provide liquidity

Due to [divergence loss](#), you are not guaranteed a positive return!

How to provide liquidity

You can provide Liquidity in Orca's Classic Liquidity interface if you prefer (see Classic: how to provide liquidity).

1. Navigate to the Liquidity page (<https://www.orca.so/pools>).
2. If you have not already done so connect your wallet.
3. Find the pool you wish to add liquidity to by finding it in the pool list or search for it using the search field.
4. Click on the pool you wish add liquidity to.
5. The liquidity side bar
6. will open.
7. Select either a Full range
8. or Custom
9. position then chose the matching tab, below, to continue using this guide.
- 10.

Full Range Custom Range

Creating to a Full Range Position

1. If Full Range
2. is selected the liquidity side bar
3. will look like the below.
4. Enter the amount to deposit in one of the highlighted fields, the other values will automatically adjust, to match the deposit ratio for a full range position.
5. (optional) activate Autoswap, to automatically trade between the paired tokens to match your desired deposit
6. Alternatively you can click on max
7. or half
8. to deposit that quantity of tokens from your wallet.
9. (optional) adjust your liquidity slippage
10. by clicking on the liquidity button (bottom left of the liquidity side bar) - see [Understanding Slippage](#)
11. .
12. Once you are satisfied with your deposit values, click Deposit
13. (image 12).
14. Review the details in your wallet, including payable network fees and approve.
15. REVIEW CAREFULLY
16. it is critical you check your range and the current price of the pool match your intentions, depositing liquidity at a price not commensurate with wider market values may result in loss.
17. Deposit Complete! Your wallet will now contain a pool position NFT. In your wallet it will be displayed as a simple image with the warning "DO NOT BURN" (image 13).
18. ?
19. DO NOT
20. sell or burn this NFT. You can send it to another wallet to transfer your position, but (whale forbid) please don't burn or sell it, or you'll lose your liquidity! 21.

Creating a Custom Range Position

1. After selecting Custom Range
2. the desired range can be changed in five ways
3.
 1. By dragging the sliders
4.
 1. By selecting a preset $\pm\%$ range
5.
 1. By free typing a $\pm\%$ range
6.
 1. By free typing the prices in the lower
7.
 1. and upper
8.
 1. fields
9.
 1. By using the +
10.
 1. and -

11.
 1. buttons in the lower
12.
 1. and upper
13.
 1. fields
14. 12.
15. Enter the amount to deposit in one of the highlighted fields (image 16), the other values will automatically adjust, to match the deposit ratio for your chosen range.
16. (optional) activate Autoswap, to automatically trade between the paired tokens to match your desired deposit
17. Alternatively you can click on max
18. or half
19. to deposit that quantity of tokens from your wallet.
20. (optional) adjust your liquidity slippage
21. by clicking on the liquidity button (bottom left of the liquidity side bar) - see [Understanding Slippage](#)
22. .
23. Once you are satisfied with your deposit values, click Deposit
24. .
25. REVIEW CAREFULLY
26. it is critical you check your range and the current price of the pool match your intentions, depositing liquidity at a price not commensurate with wider market values may result in loss.
27. Review the details in your wallet, including payable network fees and approve.
28. Deposit Complete! Your wallet will now contain a pool position NFT. In your wallet it will be displayed as a simple image with the warning "DO NOT BURN" (image 21).
29. ?
30. DO NOT
31. sell or burn this NFT. You can send it to another wallet to transfer your position, but (whale forbid) please don't burn or sell it, or you'll lose your liquidity! 32.
