This is my personal research workspace.

My main focus at Flashbots is redistribution. Here is a categorized cross-linked trace of the references I've been exploring: [Redistribution](#).

I think this redistribution exploration has to follow five dimensions:

- [Universal Basic Income](#)
- Rewards to individuals proportional to the value they create
- Funding for public goods
- Awareness for [7 generations into the future](#)
- Mourning, healing, and space for all the more-than-human critters being affected in the process.

Read more about the introduction of my research path here: [The dream of redistributing the extracted value](#)

[And here is my mindmap](#).

What I'm actively working on

- [Learning RISC-V](#)
- [The culture hack curriculum](#)
- [Experimenting with discoverability in this forum](#)

Also, see [my topics tagged #work-in-progress](#). Some might be dormant.

I do a lot of my work with my local community, mostly in Spanish. [Cuyeo en el ecotono - JáquerEspeis - Bunqueer Virtual](#)
