

By allowing people whales who hold \$APE to stake, especially with no limit, we can expect whales to purchase a large amount of \$APE to gain fast rewards in the staking pools, and immediately dump the coin.

Anyone who was around for the defi summer knows that whales dump immediately after getting staking rewards.

People who hold Yuga NFTs like BAYC, MAYC, etc are less likely to dump apecoin because they are bought into the ecosystem with high value NFTs.

This should be enacted before staking goes live or the price of \$APE will tank.

Proposals submitted to the AIP Ideas category can be vague, incomplete ideas. Topics submitted here are not required to be submitted as a formal AIP Draft Template, however, you may still use the [template](#) if you wish.
