

Thanks everyone for the inputs, looks like most voted for OpenNFT and EnftyMart.

I will reference OpenNFT's simplistic theme and complement its lack in presets with the EnftyMart theme. I will proceed with the purchase later this week. I think the templating labor hours saved will more than cover the cost of it, plus we get free tech support.

Would the CoE be fine with this? [@jrai](#) [@aventurine](#) [@surajp](#)
