ABSTRACT:

Of course, there is no connection between ApeCoin and Yuga Labs BUT we all know that their image is very related.

As you know, ApeCoin is going to sponsor a Formula 1 team.

Each team is made up of 2 drivers.

My idea is to offer each of its pilots a BAYC or MAYC.

They are free to do what they want with it, put it in PFP on social networks, on their F1 helmet, whatever...

At least we have the opportunity to see the 2 drivers of the F1 team having fun with their BAYC/MAYC.

OVERALL COST:

Allow pilots to select the BAYC or MAYC of their choice themselves, within the limit of 20 ETH.

Thanks for your feedback.
