

Poll

:

Deposit 35,000 UNI into a 365-day Sablier (<https://sablier.finance/>) money stream destined for Serv.eth Support (<https://serv.eth> under construction).

Serv.eth Support will provide 24/7* end-user support in the Uniswap Discord server. If they are unable to answer a users question directly they will triage the issue and gather any potentially necessary details, or redirect the user to a more appropriate place to ask their question. Serv.eth Support would monitor all channels except for the foreign language channels and the development channels.

*lunch breaks and unexpected catastrophic event may cause small gaps in coverage from time to time.

At such time as Uniswap governance acquires USDC or DAI, a new proposal will be submitted that cancels the existing Sablier money stream and replaces it with a 50,000 USDC/DAI per year money stream (pro-rated for remainder of the year).

If Serv.eth Support fails to provide the level of service governance feels is worth the asking price, a new proposal will be submitted that cancels the existing Sablier money stream.

Options:

-Yes

-No
