

Bored Art Not Club (BANC): Who We Are

We are OG apes Javi and Meirav, and together we created the one-stop 'mom & pop' filter shop known as Bored Art Not Club (MBA License # 00037). We create custom ape hands to match every fur type in both ape and mutant collections on our automated bot, which can be accessed by anyone at gen.boredartnotclub.com

Our Mission:

Bored Art Not Club's mission is to put fun high-quality custom art in the hands of apes and mutants to help them better engage with others, promote their MBA products, and expand their social network in organic and eye-catching ways. The generator is free and easy to use. Simply type in an ape or mutant ID#, select a hand command and any other customization from the drop-down menus, right click save, and it's yours to share however you like!

We Are Not F#@king

Leaving

It started out as a hobby in 2021. We loved creating derivatives for apes! We made the Anon mask and the red carpet looks for the VMA awards, staying up all night to send custom images to anyone who asked. We soon realized we could build fun things a lot more efficiently if we had a way to automate, and we pitched the idea for what became our first official automated collab with Ape Water. People enjoyed posting their apes with their own custom Ape Water can in hand, which made for fun and organic guerrilla marketing.

After that, we created the 'GM mug' filter, which became wildly popular with the apes and has since been adapted by countless other communities. Our art has become a go-to for apes, spreading far and wide on the timeline to show that apes are here to stay!

Supporting MBA's & The ApeCoin DAO:

Since 2022, we have built up an impressive collection of hand filters. We've collaborated with well-known brands including Ape Water, 288 Gang, FuegoApps, Applied Primate Engineering, Bicycle Cards, ApeVine, 10KTF, Yuga Labs, 6079, Welcome Apes, Bored Tea, and members of our ApeCoin Special Council. This past year, we also teamed up with Thank APE to bring custom ApeCoin art to the community as finalists in 3 contests, giving every ape and mutant a custom hand filter holding ApeCoin with a matching suit as well as an animated ApeCoin Walk filter, and also putting ApeCoin in the hands of 5 additional communities: Cool Cats, Degen Toonz, Chimpers, Gutter Cat Gang, and alien frens.

Role and Culture

We have been grinding for the ape community and making a name for ourselves with our art and automation across Web3. Our humble craft has grown organically into a beautiful collab-based business showcasing MBA's. And now that we have also been selected as recipients of ThankAPE's BBAC grant, we are able to offer our designs and ideas to the community in

a more consistent way.

Future Plans:

We have big plans to level up and generate creative new ways to continue to make aping fun! Keep checking our generator for fun surprises every month!
