

Hi All,

I transferred my SCRT to keplr wallet today, and although the transaction is showing as complete in Hotbit, it does not show up in my wallet. When I view the hash it states: " This chain is dead and some features may not work. Want to see the [latest chain](#)? and the page display is: "Sorry! We're having some trouble loading and displaying this data. Please try again later."

Please help if you can.

Thank you

Lizzy
