

Join us this Wednesday at 5pm UTC for an X AMA with the Uniswap Treasury Working Group. We'll be diving into key topics and insights from the UTWG's report, including the DAO's north star objectives and community feedback, proper approaches to UNI token accounting, and strategies for effective treasury mobilization and the use of a stability fund. The working groups findings also touch on best practices for treasury management, manager selection processes, and lessons from other DAOs' experiences. Don't miss this opportunity to engage and ask your questions!
