

Hey guys, long term holder since Ethlend... I have simply gone to sleep and woken up to Cream finance "pausing" their Lend market on their platform, and im stuck with 8600 lend in there with no liquidity left? They say they have confirmed with us there is no decided migration end date yet, but the protocol shouldn't leave funds not paid, and regardless obviously I voted for this migration. But not at the expense of falling asleep and losing most of my life savings... can they migrate the LEND pool straight to AAVE? please help... ???
