

Hi everyone,

The extension of the Grants program includes the addition of a Grantor role, as outlined in the original [proposal](#). The program has also split its funding allocation into two buckets: Community initiatives and Strategic initiatives. Grantors are appointed to each bucket to prioritize funding efforts among different areas of expertise. In the recently approved proposal the following appointments were made:

Strategic Initiatives: Reverie Reserves, LLC (as sole Grantor)

Community Initiatives: RoboMcGobo and a future additional Grantor

We would now like to invite community members to apply for the second Grantor role alongside RoboMcGobo in the Community Initiatives bucket. Applicants can submit their interest in this thread. Once received, the DGP team will reach out to all interested members for a quick interview. Finally, the Trustees will vote on the candidates and the candidate with the most votes (and at least three votes) will be selected.

Here are few questions to answer in the initial application:

- What's your background? What previous work have you done, especially within crypto communities?
- Why are you an ideal fit for the role?
- What should the DGP prioritize as part of this extension?
- What is the role of the Community and Ecosystem in the growth of dYdX?

As a reminder, the Grantor is responsible for the following:

- Drafting RFPs
- Screening, conducting diligence, interviewing, and negotiating with applicants in their category
- Submitting grants for approval
- Assessing recommendations from other Grantors
- Engaging and monitoring the progress of approved grants

We aim to have our selection completed by the end of next week (Sep 29). Updates will be shared throughout the process.

We are looking forward to all applications!

Best,

Felix, DGP Lead Trustee
