

Create your first visualization

How to create a combination bar chart and line chart to visualize the monthly gas spent for your wallet

After executing a query, you'll be presented with a set of results. The next logical step? Visualize that data for a clearer insight. This guide will show you how to layer a combined bar and line chart atop the data from [Create your first query](#).

Here is a visual click-through version if you are more of a visual learner. Below is a written version.

1. Begin Visualization
2. : Click on "New Visualization" and select your desired chart type. For this tutorial, initiate with a bar chart and click "Add Visualization."
3. Display Data
4. : By default, the chart will showcase `monthly_gas_spent`
5. . To augment the depth of insights, include the `cumulative_gas_spent`
6. column.
7. Adjust Chart Type
8. : Transition the representation of `cumulative_gas_spent`
9. from a bar to a line chart, offering a more nuanced view.
10. Fine-tune Your Chart
11. : Customize the display values for a polished look. For detailed formatting guidance [refer to this resource](#)
12. .
