

Calling all builders of Uniswap v4 hooks!

We are excited to announce that applications for the Uniswap Foundation Security Fund (UFSF) will open November 11!

From Nov 11 to Nov 29, 2024

23:59 UTC, projects building Uniswap v4 hooks

can apply to receive a subsidy

for security audit services under the \$1M UFSF

. If this sounds interesting to you or someone from your network, you can declare your interest by completing [this intent form](#).

How will it work?

Selected applicants will gain access to subsidized security services from the list of whitelisted security providers in a dedicated audit services marketplace. Since the auditing firms are competing for conducting the audits, projects can choose from the highest-quality services. You can find all these important details and more in the UFSF Notion Hub [here](#).

Additionally, you can stay connected to any updates by joining the Builders' Telegram channel [here](#).
