

# Troubleshooting

Before creating an issue with EigenLayer support please check this page to see if you can resolve your issues. If you are still stuck, please create a support ticket

## Getting "no contract code at given address"

If you are getting this issue then either you are using a wrong rpc in your [operator.yaml](#) file or you have wrong smart contract address in your [config](#) .

- Please make sure you have correct rpc node chosen for your network and that it is also reachable via your machine.
- Please find the correct smart contract addresses [here](#)
- . [Previous Operator FAQ Next Operator Security Risks, Mitigations, and Best Practices](#)
