

AIP Name:

[AIP-98: A Community-First ApeCoin DAO Marketplace Proposal](#)

Implementation Status:

Complete

Author:

[@zheerwagen](#)

Abstract Summary:

A community marketplace is a natural next step for the ApeCoin DAO. A successful community marketplace will: drive adoption of \$APE through \$APE listings, drive traffic to the ApeCoin DAO (apecoin.com), and decrease fees to community members by building a APE-native marketplace with rich ape-specific user experiences. In order to compete this marketplace must be cost competitive with fees in-line with or lower than competitors like X2Y2.

Our marketplace will host all Yugaverse projects in a single marketplace UI, with dramatically reduced fees, keeping \$\$ in the BAYC ecosystem and improving the marketplace experience for both buyers and sellers.

Overall Cost:

There is no cost associated with this AIP.
