

Future Products

zkSwap Finance is continuously working on developing and launching new DeFi products to enhance its ecosystem. We are currently considering several upcoming products, which may include (but are not limited to):

- StableSwap:
 - a stablecoin exchange protocol that eliminates impermanent loss and reduces slippage.
- Launchpad:
 - Select and introduce quality and potential projects to our valuable community
- Vault:
 - allows users to easily manage their crypto assets and maximize their returns through automated yield strategies.
-

All of these aim to address various challenges in the DeFi space and offer innovative solutions & provide a diverse range of options to users, making zkSwap a one-stop-shop for all their DeFi needs.
