

Hello,

my first post here, big fan of Aave as a fairly new user, and kudos to everyone who makes it happen! Been reading this forum for a couple of days and i'm impressed by the level of respect and professionalism here.

In the various discussions i perused, and from googling too, i found various dashboards that i found helpful in answering many questions i had:

- [DefiLlama Aave Dashboard](#)
- [Chaos Labs Aave Dashboard](#)
- [Aave Analytics TokenLogic](#)
- [AAVE Mega Dashboard](#)
- [Aavescan](#)

And of course i must mention the official [Aave docs](#), too. For understanding how Aave works, that has been extremely helpful, too.

Maybe a compiled list of links is helpful to the community, and i want to tentatively suggest maybe worth including into the official documentation?
