

The DAO treasury currently holds around \$600,000,000 in LDO and \$50,000,000 in ETH. I propose a sale of some LDO tokens (around anywhere >\$10,000,000) for DAI to be farmed in the case a bear market happens to ensure Lido is well-capitalized in all market conditions.

Edit:

People suggesting goals to be set.

How about \$50,000,000 in LDO tokens to be sold over a 3 month period, which will be sold into USDC and farmed with yearn?

read this thread for more details:

DAO treasuries are in an extremely fragile state.

While holding a large stake in their native token is beneficial to reward the community, it may prove detrimental in turbulent markets.
