

As you may already know Vyper is one of the most popular languages for smart contracts development, known for its security, simplicity and auditability.

LEGO Vyper grant

Lego Council has voted for a Boulder grant for development of [Vyper](#) — smart contract language for EVM. Lido dev team uses Vyper for different integrations & ops contracts. The Lido Vyper code held more than 600k ETH worth of user funds, and the plan is to continue using the language and tooling.

The grant is \$100k-worth to be paid in LDOs by two-weeks TWAP to Vyper dev team GitCoin address.
