Reason for Modification

During the holidays, the MIPs portal stopped showing the list of MIPs. Even though they were available on GitHub, we believe it would be a better UX to have them always available on IPFS so that people can access them easily. I must say that this is not an original idea, since we saw that the [GitHub repo for the MIPs](#) already had a workflow intended to deploy to IPFS, for which we also suggested a fix ([link to PR](#)).
