

The growing number of tokens listed in Uniswap has made it important that a category is created for each of the tokens listed in the exchange to have a group in here where new users can easily read up reviews about them. This would also give the liquidity providers in the projects the ability to discuss on how to join the team to move the project forward since Uniswap has been a major supplier of quick liquidity for new projects in the Ethereum blockchain.

Scam projects can also be known by reports from the investors to save newer users from been victim. With this, Uniswap will contribute it's quota in promoting a clean crypto world.
