

Let's add YFI to the Default list on [app.uniswap.org](https://app.uniswap.org).

Compared to other tokens in the list, without naming names, YFI is:

- sufficiently decentralized
- was reasonably fairly distributed
- is a productive revenue-generating asset
- highly liquid
- not a useless friction token (aka utility token)
- does not rely on hot-potato ponzinomics
- its community has not carelessly put users' deposits at risk
- its ecosystem is live and evolving, has not shut down operation
