

Dear Arbitrum DAO community,

On July 14th, Fractal ID experienced a major data breach. As one of the 5,000 victims, I'm calling for immediate action.

My compromised data includes:

- Name
- Email addresses
- Wallet addresses
- Physical addresses (pro and personal)
- Images of uploaded documents, including IDs, company's docs...

Fractal ID can't confirm which specific data was downloaded.

This breach exposes us to potential identity theft and fraud. We need a new, secure KYC/KYB provider ASAP.

Nomination criteria:

1. Top-tier security measures
2. Transparent data handling
3. Crypto industry experience

I'm inviting everyone concerned by this issue to submit nominations with provider details, security protocols, and references.

Deadline: August 15th, 2024, 23:59pm UTC.

Let's prioritize our community's safety and privacy.
