

Hi all,

I'm simply following <https://build.scr.t.network/dev/contract-dev-guide.html> and it compiles well, but afterwards, when running unit/integration tests or cargo scheme

I'm getting:

```
Compiling cosmwasm-sgx-vm v0.9.0-alpha1 (https://github.com/enigmampc/SecretNetwork?tag=v0.5.0-alpha2#b1710787)  
error[E0432]: unresolved imports cranelift, crate::backends::get_gas_left --> /home/p1/.cargo/git/checkouts/secretnetwork-  
2885a5c51d1243af/b171078/cosmwasm/packages/sgx-vm/src/backends/mod.rs:24:9 | 24 | pub use cranelift::{backend,  
compile, get_gas_left, set_gas_limit}; | ^^^^^^^^^^^ use of undeclared type or module cranelift | ::  
/home/p1/.cargo/git/checkouts/secretnetwork-2885a5c51d1243af/b171078/cosmwasm/packages/sgx-  
vm/src/instance.rs:20:5 | 20 | use crate::backends::get_gas_left; | ^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^
```

```
error: cannot find macro imports in this scope --> /home/p1/.cargo/git/checkouts/secretnetwork-
2885a5c51d1243af/b171078/cosmwasm/packages/sgx-vm/src/instance.rs:94:13 | 94 | imports! { move || { setup_context::
(gas_limit) }, "env" => {}, }; | ^^^^^^^
```

error: cannot find macro imports in this scope ...

What could be wrong? Do I miss anything?

I run it on Ubuntu 18.04 with SGX working well.
