## Starter Kit Reference

The [Starter Kit](#) is the starting point for integrating the Safe account in the front-end, as it provides the most simplified way to handle the Safe transaction flow in its different forms:

- User operations
- Multi-signature transactions
- Off-chain and on-chain messages

## Install dependencies

To add the Starter Kit to your project, run:

```
pnpm npm yarn _10 pnpm add @safe-global/sdk-starter-kit
```
