

Installing tKey iOS SDK

Installation

Swift Package Manager

Add the tKey iOS SDK to your project

1. In Xcode, with your app project open, navigate to **File > Add Packages**
2. .
3. When prompted, add the tKey iOS SDK repository:
4. <https://github.com/tkey/tkey-ios>
5. From the **Dependency Rule**
6. dropdown, select **Exact Version**
7. and enter **0.0.4**
8. as the version.
9. When finished, Xcode will automatically begin resolving and downloading your dependencies in the background. [Edit this page](#) [Previous](#) [Web3Auth](#) [CoreKit](#) [tKey iOS SDK](#) [Next](#) [Initialize](#)
