

What up Optimism Collective fam! For the last year I have been working at the Optimism Foundation as a contribution manager, mostly leading the Ambassador program.

I have since left the Foundation and I am excited to begin participating in governance again! You will notice that there is a gap in my governance participation over the last year due to the fact that Optimism Foundation employees are restricted from participating in governance.

Previous to joining the Foundation I was a delegate as well as the lead of the NFT and Gaming Committee during Season 2 of Optimism governance.

I will be using this forum to post all my future voting rationale
