

Hi,

it seems there is a suspicious transaction, which moved some of the aEthWETH (created during borrowing at Aave) from my account to a different account. Is this something Aave related?

Transaction hash: 0x09f8446f2cd2bbd5ed12edddc8d38988d7e9fd5f3ffdb86e1c0d113ce106b28d

Thanks for looking into it.

Best,
