

Funding Request for Core Artificial Intelligence System (CAIS) Project

Hello MakerDAO Community,

The Ecosystem Scope team is ready to start pursuing the Core Artificial Intelligence System (CAIS). We believe this initiative will significantly enhance our capabilities and drive community growth.

We are currently requesting 100,000 DAI from the CAIS Bootstrap Budget to initiate the work. Based on successful project progression, we anticipate a further investment of 400,000 DAI with our chosen vendor. This substantial investment demonstrates our commitment to this ambitious project and our confidence in its success.

The CAIS project will be managed under the Ecosystem Scope in accordance with [MIP106](#), ensuring transparency, accountability, and efficiency. This initiative marks a significant milestone for the Ecosystem Scope and the entire MakerDAO community.

A poll seeking MKR holder approval for the funding of the CAIS project will be live later today. We strongly encourage you to participate in the voting process, which will conclude on Thursday at 16:00 UTC.

If you have any questions, comments, or need assistance, please feel free to reach out to us via direct message.

Best regards,

Ecosystem Scope Team
