

During the May's Lido Treasury Diversification [Proposal: LDO Treasury Diversification](#) & [Proposal: LDO Treasury Diversification - Part 2](#), three angel investors weren't able to make the purchase in one-month timeframe. We're proposing to set up purchase contract to give them option to make the purchase, with total amount of 462962.9629629634 LDO for 100.0000000000001 ETH. Other conditions are the same as the previous time: 1-year lock + 1-year vesting, 1-month timeframe for making the purchase.

Our intent is to fulfill Lido's part of the agreement made with strategic investors. In case the angels couldn't execute the purchase in one-month timeframe, there would be no other attempts to allow it from the Lido's side.

If that proposal is at all controversial to anyone, please express your opinion and I'll start a snapshot signaling poll; otherwise, it will be started as a separate Aragon voting on Thursday, September 23th, 2021.
