

Daily Trade Volume

Description

This dataset provides the daily trade volume per pool for all PancakeSwap protocols . Data from all the networks and versions are taken into account, from 26.09.2023 until 26.03.2024. Individual rows are omitted if there were no trades executed in a given day above the threshold of 1 USD.

Schema

- day - date
- token_pair - symbols of the token pairs
- project_contract_address - contract address of the DEX
- version - PancakeSwap protocol version
- blockchain - network of the DEX contract
- daily_volume_usd - daily trade volume in USD
-

The dataset uses day ,project_contract_address as the primary keys.

Potential Use Cases

- pool specific trade volume prediction
- automated LP strategies
-

Use example

...

Copy from `giza_datasets` `import DatasetsLoader`

Usage example:

```
loader=DatasetsLoader() df=loader.load('pancakeswap-daily-volume')
```
