

Carbon DeFi Subgraph

The Carbon DeFi Subgraph enables lightning fast queries that can answer most, if not all, data-related questions for Carbon DeFi. The Carbon Defi Subgraph uses The Graph protocol, a decentralized data indexer, that enables rich queries that can be generated using their interactive UI.

The Subgraph can fetch details for:

- Strategies
- Trades
- Token pairs
- Users
- And more!
-

See the following sections for more details about how to use the Subgraph:

- [Accessing the Subgraph](#)
