

How to use ASI Alliance Wallet

Feature 5 - More Options

- Open ASI Alliance Wallet Dashboard.
- Navigate to More Tab
- .

More Option - Currency

Within this section, you can set the currency configuration for your wallet. You can do so following these steps:

- Access Currency
- option.
- Within More
- , locate and select the Currency
- option.
- Here, you can change the currency from USD to any other available currency.

Manage Token

In the Manage Tokens section, you can view the tokens you've added and their details.

You can add new tokens by clicking on the + sign next to the tokens list.

Address Book

- Access the Address Book
- section.
- View Existing
- addresses.

Add an Address

You can add a new address by clicking on the + sign button.

Edit an Address

- If you need to edit an address:* Click on the three dots
- - (...) next to the address.
- Select Rename
- option.
- From there, you can edit the address Name
- , Memo
- , and Address
- itself.

Delete Address

- To Delete an address
- :* Click on the three dots
- - (...) next to the address.
- Select the Delete Address
- option to remove it.

- Click on Remove
- option.

Security and Privacy Options

- Explore the Security and Privacy
- section. Here, you can:
- - View your mnemonic seed after entering your password.
- Click on View Mnemonic seed
- option.
- View your mnemonic seed after entering your password.
- Users can copy the mnemonic seed by clicking Copy to Clipboard
- .

ASI Alliance Wallet Version

You can check the version of the app under the ASI Alliance Wallet option.
