

I am not sure if I am posting this in the correct subforum, but I couldn't find any obvious "bug report".

As I was claiming my Rewards at [Secret Bridge](#) the popin

on the right displayed 7 sETH

(

wish was true) when in reality I got 7 sSCRT

. See can see on the screenshot below:

The same thing happen to sDAI

, and I presume its happening with all. It seems to be just cosmetic issue, since the sSCRT in my wallet is correct as expected, etc.
