

As announced a few weeks ago [ApeKin is available on Nifty Island as avatar](#) for ApeCoin holders.

This was just the first step of the plan. The company Art Unchained who was highly recommended by the Nifty Island community is commissioned by the ApeCoin Metaverse Working Group to build a dedicated Island Experience.

The idea is to involve the community as much as possible in this process that should take around 2 months to complete.

I will use this post to give updates about the process and also ask the community for feedback, starting with: ApeKin style!

ApeKin V1

UPDATE #2

- October 6th

Following the vote, the new version of ApeKin is in development. Meanwhile the island is taking shape as the core terraforming and landscaping is nearly complete. There are over 70 unique 3D assets and building being crafted for the experience. The colossal temple design is in progress and of course with it comes many traps!

A little bit more patience before some visuals are unveiled as we want to keep as much surprise as possible...
