

Welcome to the Optimism Docs

Welcome to the Optimism Docs, the unified home of the [Optimism Collective's](#) technical documentation and information about the [OP Stack](#). Information about the Optimism Collective's governance, community, and mission can be found on the [Optimism Community Hub](#)([opens in a new tab](#)).

Guides for Builders

Whether you're a developer building a app on OP Mainnet, a node operator running an OP Mainnet node, or a chain operator launching your own OP Stack chain, you'll find everything you need to get started right here.

Learn About Optimism

OP Mainnet is an [EVM equivalent](#)([opens in a new tab](#)) Layer 2 blockchain connected to Ethereum. The OP Stack is the standardized, shared, and open-source development stack that makes it easy to spin up your own production-ready Layer 2 blockchain just like OP Mainnet. The Superchain is a network of OP Stack chains that share a bridging protocol, governance system, and more. We've got you covered with these detailed guides to help you learn all about Optimism's tech stack.
