

Hello all,

Pulsechain launched on May 12th 2023 public ally.

And with that there is a Dai contract that was copied. At first it had no value monetarily. It is the same contract address as the one on ethereum.

This Dai:

<https://etherscan.io/token/0x6b175474e89094c44da98b954eedeac495271d0f>

Is the same contract as this Dai but on pulsechain:

<bafybeicb2hlad6zs4kc4yvn5xbbzti6krjtpoxrysg42d4e5s5oubbipum.ipfs.dweb.link>

## **PulseChain Explorer**

PulseChain Explorer

What are the chances that makerdao itself contributes to the narrative or possibility of a backing for the dai that was copied.

The current price is \$0.0035 per Dai on the pulsechain blockchain.

Here is more information about pulsechain and the real funds that are circulating in and out of pulsechain.

Can and will makerdao support pulsechain?

Thank you.
