

Proposal Name:

Add "Individual User Vote" Metric to Snapshot

Proposal Category:

Process

Abstract

Add "Individual User Votes" or "Individual Wallet Votes" (Name TBD), right below the "Current results" metrics on Snapshot to better inform readers at a glance of how many wallets actually voted for or against an AIP.

Motivation

Adding this metric will give a user a better story of how many users are actually for or against a particular AIP at a glance regardless of how much \$APE they hold without having to manually drill down.

Rationale

I find myself looking for this metric and thought why can't it just be displayed.

Specifications

Add this metric below the "Current results box" - this will not affect the outcome of the vote but helps tell a more accurate story of the vote. Would look something like the following:

Steps to Implement

Unsure, perhaps there is a plug-in already built in?

Timeline

As soon as possible

Overall Cost

Unsure, perhaps the price of the plug-in if there is one?

Proposals submitted to the AIP Ideas category can be vague, incomplete ideas. Topics submitted here are not required to be submitted as a formal AIP Draft Template, however, you may still use the [template](#) if you wish.
