

Thank you ABUNDANCE DAO and DoDAO ACADEMY for your WORK building PUBLIC GOODS!

ACRE DAOs, the [Creator Member](#) of the Regenerative Finance Aligned Voter Committee (AVC), is pleased to announce the participation of two members who will represent the ACRE DAOs community as active contributors to ReFi AVC Subcommittee Meetings and [Quarterly Position Papers](#) in Q4 2023.

In recognition of their important contributions to developing Public Goods for the benefit of Web3 and demonstrated interest in specifically applying their skills for the benefit of MakerDAO, ACRE DAOs has awarded Abundance DAO ([@Abundance](#)) and DoDAO Academy ([@robin_nagpal](#)) 5 MKR and 10,000 ACRE* each

from the ACRE DAOs treasury.

We will further share 30% of any Q4 AVC Member Rewards earned by ACRE DAOs to each of Abundance DAO and DoDAO Academy for their support of the ReFi AVC this quarter.

Special appreciation for [@robin_nagpal](#) who was among the early founding group of ACRE DAOs token holders in the pre-season of Season One (Feb 2022). He helped us consider what educational tools we could build to help introduce new members to our Regenerative Finance/Impact Investment community.

We look forward to how DoDAO Academy's work on [Maker AI Chatbot - Governance AI Tools\(GAITs\)](#) and participation in Maker governance through ACRE DAOs can be of effective assistance to the building of the next generation Atlas and GAITs.

We wish to share this news with the world as an example of how MakerDAO is already and in creative ways supporting the Public Good and fulfilling this purpose.

[@fhomoney](#) will follow up with [@tobalgarcia](#) and team to craft an appropriate announcement for the community account on X as described here: [Request for Distribution of AVC Content on MakerDAO's Official Channels - #14 by tobalgarcia](#)

About ReFi AVC from our Q3 Governance Strategy paper:

[MKR Regenerative Finance \(ReFi\) Strategy & Priorities](#)

AVC Profile

We are MKR holders and guardians of the public good.

We shape Maker governance through a Balanced lens valuing innovation & the discerning stewardship of funds.

We prioritize the provisioning of a decentralized, permissionless and globally available "Unbiased World Currency."

Executive Summary

Over the course of several quarters, the Regenerative Finance AVC will develop this Aligned Governance Strategy document through an iterative process of:

- (A) synchronous community gathering at scheduled Subcommittee meetings;
- (B) incorporating asynchronous knowledge work and comments from our Aligned Delegates;
- (C) engagement with DeFi and TradFi participants outside of our particular governance bubble, including MakerDAO Ecosystem Actors, counterparties and other stakeholders; and
- (D) publishing an updated and revised version of this Governance Strategy at the conclusion of every calendar quarter.

The ReFi AVC Governance Strategy is framed by the following three broad priorities:

1. Resiliency through Legitimacy and Social Consensus.
2. Defining "Regenerative" Finance, or ReFi, for our purposes as both organizational (decentralized) and technological (crypto-native) change empowering ordinary people with permissionless access to financial services that are anti-fragile, transparent and corruption-resistant.
3. Advocating for research and development of alignment-based incentive structures and mechanisms for subDAO adoption and use.

*IMPORTANT DISCLOSURE:

ACRE DAOs

Membership in ACRE DAOs is technically defined at this time as holding 1,000 ACRE tokens in a wallet. The tokens have

no monetary value and do not trade on any markets. We are interested in the utility of the ACRE token for social coordination and not speculative investment value.
