

Bridging ERC721 Tokens from L1 to L2

In this example, we will use the MNT ERC721 test NFT as the transferred NFT.

Go to the Deposit tab of the rollup bridge at <https://bridge.ata.network> . In the token selector, choose MNT and the index of the NFT you wish to bridge to Automata Testnet.

?

If this is your first time bridging MNT NFTs, you will have to allow the bridge to transfer MNT on your behalf.

?

After you confirm the transaction and allow the bridge to transfer tokens, you will be given the option to deposit the NFT.

?

Clicking "Deposit" will prompt your wallet to request your confirmation to initiate the deposit. After you confirm, the deposit will be initiated and, shortly after, you will receive the NFT on Automata Testnet.
