

# Bidding

## Searching Bids

POST /v0.1/search/bids

Pass in a list of names and get back their highest bid and if they are available or not. This is useful if you want to facilitate bids directly on chain.

Name Description POST body An array of names Example

...

Copy curl--requestPOST\ --urlhttps://api.clusters.xyz/v0.1/search/names\ --header'Content-Type: application/json'\ --data["clusters/", "namethatdoesntexist/"]'

...

## Response

List of bids and whether they are available or not

200 500 ``

Copy [ { "name":"clusters", "highestBidWei":"0", "highestBoostedBidWei":"0", "highestBidAddress":null, "isAvailable":false }, { "name":"namethatdoesntexist", "highestBidWei":"0", "highestBoostedBidWei":"0", "highestBidAddress":null, "isAvailable":true } ]

Copy null
