

There's not much liquidity for LDO on dexes at all. No listings on major cexes. Counter to this CEX proposal [Proposal to incentivize CEX listings](#)) I think it's more important to deepen liquidity on dexes, since Lido is all about decentralization. There was incentivized LDO/stETH pool on 1inch. Now there is another incentivized pool on 1inch for stETH/DAI. Maybe it's time to revive 1inch LDO/stETH pool? And maybe 1inch guys will fork out some tokens together with lido. Same double incentives as in stETH/DAI pool, just lesser amount.
