

LP Tooling & Automation

Summary

Aperture is launching a suite of features designed to improve the experience of providing liquidity on Uniswap V3. Our initial features include:

1. Automated position rebalance based on pricing, pool ratio, and time
2.
 - e.g. "If ETH rises to 2,500 then rebalance my ETH-USDC position back to 50-50"
3. *
4. Automated position closure based on pricing, pool ratio, and time
5.
 - e.g. "If ETH rises to 2,500 then remove all liquidity and return the assets to my wallet"
6. *
7. Auto-compounding of fees
8.
 - compound fees back into the position at a frequency that is optimized for gas costs
9. *
- 10.
