

GM everyone, Josh here from iYield!

I wanted to share how iYield makes managing your Eigenlayer restaking positions easy and efficient. With iYield, you can track:

- Value: See the worth of your restaked assets in your preferred currency.
- Balance: Stay updated on the exact amount of assets you've restaked on Eigenlayer.
- Income: Get a clear breakdown of your rewards in both your chosen currency and the underlying asset, plus see your APY to gauge how well your restaking is performing.

We also support the top 13 LSTs/LRTs on Eigenlayer, including stETH, rETH, cbETH, and sfrxETH, so you're covered no matter what staking assets you use.

If you're tired of manually calculating your rewards or struggling to keep tabs on multiple positions, iYield does all the heavy lifting for you in one simple dashboard to help you stay on top of your restaking investments.

Would love to hear your thoughts or answer any questions you have! If you're curious about how iYield works or want to see a demo, feel free to drop a comment or message me at [[email protected]]
