

Transfer Ownership

How to transfer ownership of your creations

This guide explains how to transfer ownership of content, including queries and dashboards, among different users and team accounts.

Transferring Query Ownership

- Click the cogwheel button to access settings.
- In the “Owner” dropdown, select the new owner, be it another team you’re part of or a teammate within the current team.

Viewing Ownership Changes

Click the “Version history” button to see changes in ownership.

Transferring Dashboard Ownership

- Click “Edit” then “Settings” to open the modal.
- Follow the same steps as above to transfer ownership of your dashboard.
