

# CCIP Supported Networks Testnet - v1.2.0

Deprecation Notice for CCIP v1.0.0 on Testnet

CCIP v1.0.0 is no longer supported on testnet. You must use the router addresses listed on this page.

The configurations detailed on this page refer to [token pools](#) and [CCIP rate limits](#). Each supported token has a [token pool](#) to facilitate various operations for transferring token value, and to enable [rate limits](#) on token transfers. There are [rate limits for each individual token pool](#) and also [aggregate rate limits](#) that apply to all supported tokens on a particular lane. Both types of rate limits have a maximum capacity and a refill rate.

This page also lists the supported fee tokens for each lane, which shows how you can pay for CCIP fees. The [CCIP Billing](#) page explains how CCIP fees are calculated.

## Configuration

### Testnet tokens

Read the [LINK Token Contracts](#) page to learn where to get testnet LINK and native gas tokens. You can pay fees for each network in native gas tokens, wrapped native gas tokens, or LINK tokens.
